---

## Summary

I am a **Backend Developer** skilled in Laravel and CodeIgniter frameworks, seeking to leverage my technical expertise and problem-solving abilities in a progressive company that values innovation and ongoing learning. I aim to contribute my experience in building scalable, efficient web applications to support business goals and drive organizational advancement.

---

## Experience

### Designoweb Technologies

Backend Developer, Noida, Uttar Pradesh

03/2022 - Present

As an **Associate Backend Developer** with two years of experience, I've collaborated on major projects, optimizing database queries for improved performance and resolving critical production issues. My contributions include implementing caching mechanisms, delivering high-quality code, and mentoring junior developers. Additionally, I've actively participated in documentation efforts and knowledge sharing sessions, fostering team growth.

---

## Education

### Masters of Computer Applications

Abdul Kalam Technical University (AKTU), Lucknow, Bareilly, Uttar Pradesh

---

## Skills

Web Development, Database Management, PHP, MySQL, JavaScript, JQuery, AWS, Bootstrap

---

## Highlighted Projects

### Coyoacan Transportation (Booking Management)

Google Play Store [Link](#)

Coyoacan Transportation: Developed an integrated platform to manage bookings from multiple sources, including booking.com and transfers.com, for seamless driver allocation and administration.

### Metaval (Industrial Supplies)

Website [Link](#)

Industrial Equipment E-Commerce: Developed a comprehensive solution facilitating seamless sale and distribution of critical machinery and components, serving as a centralized marketplace for industrial apparatus procurement.

### Tawid (Flight Claim)

Google Play Store [Link](#)

Flight Compensation Management: Developed a user application for passengers to submit compensation claims and a dedicated lawyer panel for legal professionals to oversee flight compensation cases resulting from cancellations or delays.
